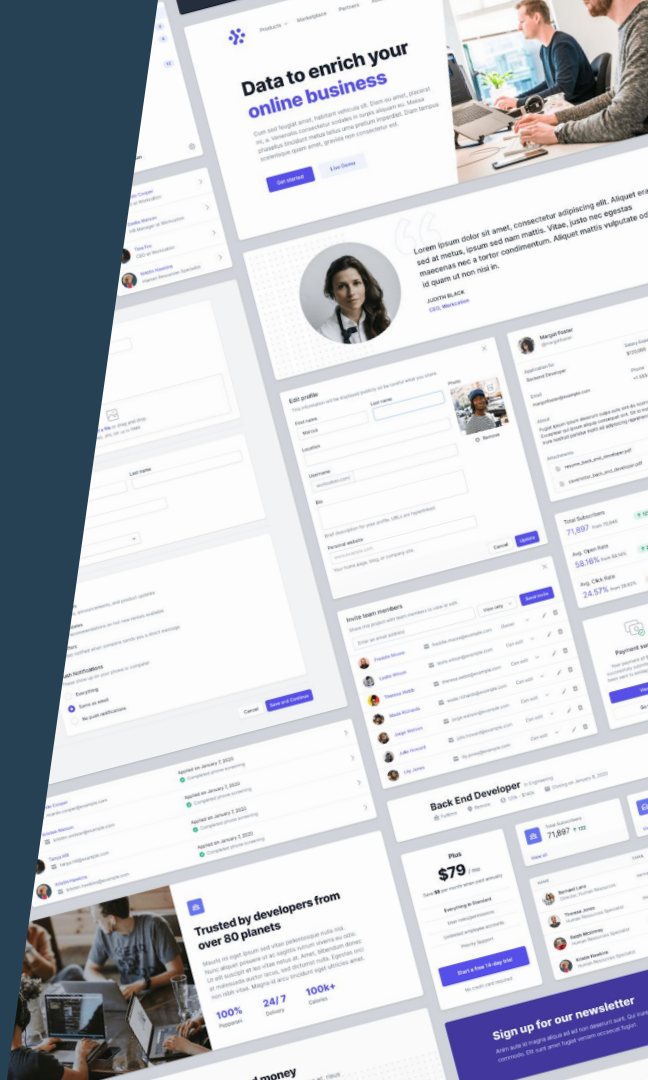
Why look at TailwindCSS?



What is not Tailwind?

1. Framework
2. Inline styles
3. *!important* styles
4. Predesigned component
5. Full of unnecessary styles

Utility-First

BEM

Important benefits

1
You aren't wasting energy

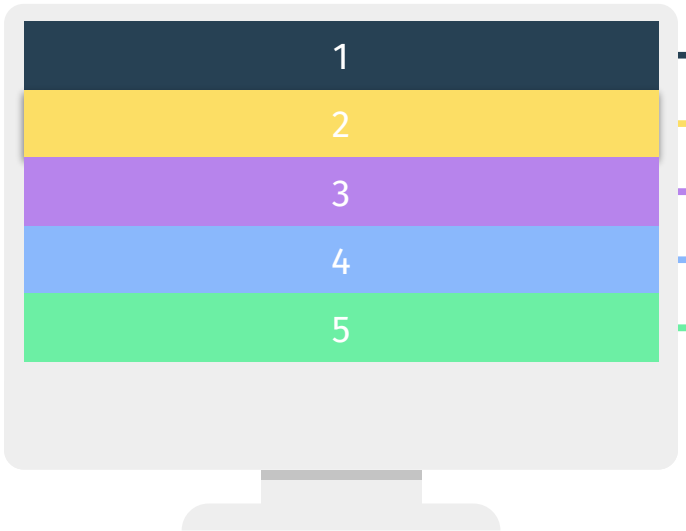
2
Your CSS stops growing

3
Making changes feels safer

TailwindCSS is inline styles.

– Everyone

Why not just use inline styles?



Designing with constraints

Responsive design

Dark mode

Pseudo-classes

No more CSS compilation
